The semi-official German press ventilated the idea with the result that so much animosity was revealed on the part of France that the Kaiser abandoned the project.

The St P.eteraburg correspondent of the Times says:

Count Muravieff, the Russian foreign minister, declares that the idea originated entirely with Emperor Nicholas. There is much scepticism in diplomatic circles as to any practical results from sides that the circular came as the greatest surprise.

The Paris correspondent of the Times still insists that M. Faure and the French ministers knew nothing beforehand and that the czar's proposal has plunged the entire official world into terrible embarrassment and almost into stupefaction. Everybody, says M. De Blowitz, is asking with dismay what it means. It is a sad awakening for France and her papers are making an immense effort to restrain their feelings
